

Typical setup for a dosing system with a single screw station.

- A Twin screw dosing station  
B Motor control

Component A is described below.

## Brief Description

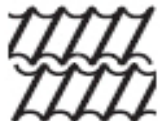

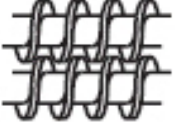

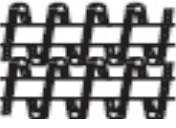

Colortronic's volumetric twin screw feeder CT22 is ideally suited for dosing powders, pellets, granulates, regrinds, fibers and flakes in continuous and batching processes.

CT22 modular design allows for flexibility to meet changes in process requirements. Volumetric feed rates range 0.4-190 l/h (0.014-6.7 cu.ft/h). The horizontal agitator constantly keeps material in motion, thus eliminating bridging and maintaining consistent screw fill. All material contact surfaces are manufactured from corrosion resistant stainless steel.

Colortronic's Voludrive controller offers the operator full access to all feeder parameters through an icon driven control interface
