

MTF Medium Tangential Series Granulators

Colortronic's 2024/2036 tangential granulators accept larger products with improved performance and are 100% American made. The MTF offers customers a solution to granulation problems by minimizing part bouncing and optimizing material processing for large, bulky parts.

Standard Features

- Complete flexibility for all rigid plastic profiles
- 24" and 36" wide models
- Angled infeed for easy hand or conveyor feed
- Convenient lower feed height of 63"
- Fully sound-dampened 85 dBA or less for most applications
- Tangential feed design for improved application versatility
- Machine bolted/doweled assembly for ease of cleaning and replacement
- Dual bed knives – counter slant, reversible and adjustable, doubling knife life
- 3 knife slant cut rotor (steep angle) including solid knife carriers
- Open design – scooped rotor for maximum air flow and ingestion of product
- Large 20" cutting circle on rotor for efficient processing of large, bulky products
- High carbon, high chrome (D2) rotor beds and knives
- Swing down reversible screens with solid edges doubling screen life and providing easy maintenance
- Airveyor discharge standard
- TEFC design – 1800 RPM motor with sliding motor base
- NEMA 12 controls with safety switch meeting latest OSHA/ANSI specifications
- Disconnect switch 115V to push-button provides safer design

Optional Features

- Conveyor with amperage feedback system
- Pneumatic discharge systems
- Dust and angel hair removal system
- Specially designed feed hoppers

Specifications

Model	A	B	C	Throughput	Discharge Motor
MTF2024	24"	52 5/8"	6"	1400 lbs/hr (630 kg)	30 HP, TEFC, 1800 rpm
MTF2036	36"	62 5/8"	8"	2000 lbs/hr (907 kg)	40 HP, TEFC, 1800 rpm

Heavy-duty, easy access base creates a stronger design with easy cleanout and servicing

Dual solid flywheels offer heavy duty cutting inertia.

High carbon, high chrome D2 knives for maximum knife quality and consistency. Solid knife carriers provide extra support.
